

# EDUCATION

---

The U.S. Census Bureau provides educational attainment data for states and the U.S. on an annual basis in the P-20 Series reports. These data are based on the Current Population Survey. County level attainment data are available from the latest decennial census.

The Kentucky Department of Education (ph: 502-564-3421, web address for statistical data: <http://kdemaxport2.kde.state.ky.us> ) collects information on graduating high school students each year, including the number and percentage of students continuing their education, entering the workforce, and entering the military. The Kentucky Department of Education also collects enrollment and expenditure data for school districts. Kentucky college enrollment data are available from the Kentucky Council on Postsecondary Education (ph: 502-573-1555, [www.cpe.state.ky.us/facts/index\\_facts.asp](http://www.cpe.state.ky.us/facts/index_facts.asp) ).
